

DLG-certified farm inputs

Barn disinfectants

The experts at DLG TestService certify barn disinfectants according to the product-specific DLG quality standard. In addition to the criteria specified for this effectiveness test, further product properties can be tested and certified. Barn disinfectants that pass the tests are awarded the DLG quality seal.

All DLG-certified farm inputs are subject to constant monitoring. Consistent product quality is ensured by regular repeat tests or analyses. In addition, samples are taken from the manufacturer or from retailers.

DLG test criteria

Barn disinfectants

- Consistent product composition
- Content of disinfectant active ingredients
- Disinfecting effect
- Material compatibility
- Surface behaviour:
  – Drying time
  – Film resistance
- Suitability for application with high-pressure cleaners or other application methods

DLG TestService is one of the leading international testing and certification organisations in the fields of tractors, agricultural technology and farm inputs. The DLG's own testing and evaluation standards are practice-oriented and are developed by neutral commissions. In addition to tests according to DLG standards, extensive testing and certification services for quality assurance, according to national and international standards and regulations, as well as customer-specific tests for research and development purposes complete the range of services. The DLG test marks are well known on the market. They stand for neutral, independently verified product quality. They build trust and form the basis for purchasing decisions made by practitioners. **dlg-testservice.com**
